

Enterprise-level Software-as-a-Service
for managing transportation sourcing

TranspoEdge brings **AGILITY** to the transport operations by **OPTIMISING** the trips and **STREAMLINING** its sourcing process **DYNAMICALLY**. It helps organizations to achieve results in terms of reduction in transportation **COSTS** and improvement in **SERVICE** quality.

ARE YOU FACING CHALLENGES IN MANAGING TRANSPORTATION THAT AFFECT COST AND SERVICES?

➔ TRANSPORTATION CONTRACTS

- Transportation contracts with forecasted loads and fixed freight for a period of time turn infeasible due to the fluctuating demands and dynamic operational expenses.

➔ AD-HOC SOURCING

- On the other hand - due to the urgent needs, operations in silos and inefficient process - Ad-hoc sourcing lacks planning, visibility and control resulting to unjustified expenses.

➔ PROCUREMENT PLATFORMS

- Procurement solutions do not support internal and external collaborations leading to visionless sourcing and offers open platforms leading to business data exposure.

SOLUTION

Optimize

Optimize transportation requirements across the geo.

Collaborate

Collaborate with internal and external stakeholders.

Evaluate

Evaluate multiple options and source dynamically.

Audit

Enable process visibility and transaction auditing.

FEATURES

- Algorithms with live geo & load data for multi-level load/trip optimization.
- Technology based secure, bidirectional request & response system.
- Enterprise level strategic, tactical, operational Analytics and Reports.
- Pay as you go model with Usage based billing.

BENEFITS

Increased
Capacity
Utilization

Reduced
Transportation
Costs

Improved
Service
Quality

Leaving less
Carbon
